SUMMARY

Aspiring MERN Stack Developer with hands-on experience building full-stack web applications using React.js, Node.js, Express.js, MongoDB, and Django. Experienced in developing responsive user interfaces, implementing authentication systems, and integrating REST APIs through academic projects and internship experience. Seeking an opportunity to contribute to innovative development teams and grow as a full-stack engineer.

EDUCATION

Graduated at PSG College of Arts & Science 2023-2026
Completed HSC at Shri KK Naidu Memorial Hr Sec School 2021-2023
Completed SSLC at RJ Matriculation Hr Sec School 2020-2021

INTERNSHIP

Accounting, Sales & Marketing Intern
Future Tech Engineering – Coimbatore

- Day to Day activities across accounting, sales and marketing functions.
- Assisted in maintaining and organizing financial records and business documentation.
- Developed good communication and better customer relationship and teamwork skills through practical business exposure.

PROJECT

Social Media: Live | SrcCode

A full-stack social platform where people can build a profile, post photos, and jump into real-time conversations with others. I built the like/comment system and chat feature from scratch, focusing on making the whole thing feel instant and responsive rather than laggy like a lot of clone projects end up.

E-Commerce Website: Live | SrcCode

A shopping site that pulls live product data from an external API, so browsing, filtering, and checking out feels like using a real store rather than a static demo. I spent a lot of time on the cart logic and making sure filtering products by category or price actually feels smooth.

YouTube Clone: Live | SrcCode

My take on rebuilding YouTube's core experience — search, an embedded video player, and a related-videos feed that actually makes sense. The tricky part was getting the MySQL queries efficient enough that suggestions load fast instead of feeling like an afterthought.

SKILL

Technical Skill:

Frontend Tech – HTML, CSS, JavaScript, React, Redux, Bootstrap.
Backend Tech – Python, Express.js, Node.js, Django.
Database – MySQL, MongoDB, PostgreSQL.
Tools & Platforms – Git, GitHub, Postman, Render, Netlify, Vercel.
